PROFESSIONAL SUMMARY

React and React Native developer with 5+ years of experience delivering production-grade web and mobile applications for US-based healthcare, HR, and legal companies. Beyond writing code, I actively shape how products are built — breaking down requirements into sprint tasks, facilitating demos, and working directly with stakeholders to align delivery with business goals.

Now seeking to expand into product roles where I can combine deep technical fluency with a user-first mindset. My engineering background means I can speak credibly with development teams, scope work accurately, and translate complex requirements into actionable roadmaps.

EXPERIENCE

Software Engineer · Ritech International AG

Dec 2021 – Present

React Native · TypeScript · React · AngularJS · Healthcare & HRA Platforms for US Market

- Engineered and maintained two large-scale production platforms serving US healthcare providers and corporations — a patient pharmacy services app (prescription refills, medication transfers, secure messaging) and an HRA employee reimbursement web platform, both built in React, React Native, and TypeScript.
- Led a full TypeScript migration of the frontend codebase, eliminating a class of runtime errors and improving developer onboarding time for new team members joining the project.
- Drove a rewrite of core AngularJS modules to React, modernising the frontend architecture and improving load performance and maintainability across the platform.
- Product & delivery ownership:** Participated in sprint planning, wrote and broke down feature specs into dev tasks, and prepared and presented release demos to stakeholders — bridging engineering output with product expectations.
- Cross-functional collaboration:** Worked closely with backend (C#/PostgreSQL) and product teams to scope, prioritise, and ship features end-to-end across two-week sprint cycles.
- Mentoring:** Supported junior developers through code reviews, pair programming, and architectural guidance, raising overall team code quality.

React · React Native · TypeScript · AngularJS · C# · PostgreSQL · REST APIs · Agile / Scrum · Git

React Developer & Frontend Team Lead · Rightsearch & Advocar

Nov 2020 – Aug 2021

ReactJS · TypeScript · Legal Services Platform Rebuild

- Led the full frontend rebuild of a legacy legal services platform from the ground up, replacing an outdated jQuery/CakePHP stack with a modern React and TypeScript architecture.
- Team lead role:** Assigned and coordinated frontend tasks across the team, ran pre-release demos, and managed communication between the dev team and product stakeholders.
- Collaborated with product team members to define and implement new feature developments, translating business requirements into user-facing functionality.
- Delivered the rewrite on schedule across multiple sprint cycles, with demo checkpoints before each release to validate product direction.

React · TypeScript · JavaScript · HTML · CSS · jQuery · CakePHP · Team Leadership

Web & Mobile Application Developer · Aldek Italia

Mar 2021 – Nov 2021

ReactJS · React Native · Laravel · Social & Membership Platform

- Built a web and mobile social networking platform with features for member management, subscription tracking, fee payments, file approvals, and connection matching.

- Implemented user flows for credits, authorisations, and member matching — requiring close attention to UX and data integrity across both web and mobile interfaces.

[React](#) · [React Native](#) · [Laravel](#) · [PHP](#) · [MySQL](#)

Freelance Software Developer · [Independent](#)

Nov 2019 – Mar 2021

- Delivered custom web application projects for clients, managing full project lifecycle from requirements gathering through to delivery.

SKILLS

Frontend	React, React Native, TypeScript, JavaScript (ES6+), AngularJS, HTML5, CSS3
Backend & DB	REST APIs, C# (working knowledge), PostgreSQL, PHP / Laravel, MySQL
Tooling	Git, GitHub, VS Code, Xcode / Android Studio, Agile / Scrum, Jira
Product	Sprint planning, requirements definition, stakeholder demos, user story writing, roadmap thinking, UX / user flows
AI & Emerging	AI Agents (HuggingFace certified), prompt engineering, LLM integration patterns
Languages	English (professional), Albanian (native)

EDUCATION

MSc Management Information Systems	<i>2018 – 2020</i>
Universiteti Mesdhetar i Shqipërisë, Tirana	
BSc Computer Engineering	<i>2015 – 2018</i>
Epoka University, Tirana	

CERTIFICATIONS

AI Agents Fundamentals	<i>Feb 2025</i>
Hugging Face · Credential ID: JorgenKonini
